

# Wayfinding Solution For Healthcare

## How can Healthcare improve Navigation and security to protect patients, staff, and assets?

CloudGate Wayfinding enhances Healthcare navigation and security with intuitive, Google-like directions, mobile accessibility, zone control, and easy map editing, ensuring safe and efficient patient and visitor movement.

### Healthcare Wayfinding Challenges

The Healthcare industry grapples with significant wayfinding challenges, primarily due to confusing floor plans that complicate navigation for patients, visitors, and even staff. This confusion can lead to unauthorized individuals, or "roamers," inadvertently entering critical areas, posing security and privacy risks. Such breaches in restricted zones exacerbate patient and staff protection issues, undermining the safety and confidentiality of sensitive Healthcare environments. The risk of theft is heightened as valuable equipment and personal belongings become more vulnerable in poorly monitored spaces. Additionally, the inefficacy of zone control mechanisms, which are not adequately governed by access control systems, further compromises the integrity of Healthcare facilities. These wayfinding pain areas highlight the urgent need for improved navigational aids and security measures to ensure a safe, accessible, and secure environment for all occupants within Healthcare settings.

### CloudGate Solution Benefits

The CloudGate Wayfinding solution offers a comprehensive approach to addressing the navigational and security challenges within the Healthcare industry. Its discreet floorplan wayfinding feature provides clear, intuitive guidance, akin to "Google-type" directions, making it easier for users to navigate complex Healthcare environments. By design, the solution ensures that sensitive areas are completely avoided, enhancing the protection of critical zones from unauthorized access. The mobile-enabled platform supports visitors, patients, and contractors, offering widespread accessibility and convenience. CloudGate helps in maintaining strict zone control by keeping visitors within areas approved for their access, thereby enhancing security and reducing the risk of theft or privacy breaches. The internal mapping editor and designer tool is user-friendly, allowing for easy updates and edits to floor plans to reflect changes in layout or access policies. Additionally, the ability to import multiple types of maps and files ensures flexibility and adaptability to various Healthcare facility needs. Overall, CloudGate's Wayfinding solution significantly mitigates wayfinding pain areas by improving navigation, security, and user experience within Healthcare settings.

### About CloudGate

CloudGate by Soloinsight is an advanced platform designed to enhance workplace experience through the automation of the management and security of physical and cyber identities in buildings. It is a comprehensive solution aimed at converging and orchestrating physical security, HR, Environmental Health and Safety (EHS), Facility Management (FM), IT, and cyber domains into a single, secure automated system for both Logical (Identity and Access Management - IAM) and Physical Identity and Access Management (PIAM) and governance. The platform is trusted by various prestigious organizations and integrates seamlessly with multiple Physical Access Control Systems (PACS) and cyber identity solutions to manage the identities and credentials of employees, contractors, and vendors, ensuring access approvals, security, privacy, and compliance across all locations.
